

# easywash365+ crevice tool holder for floor and wall mounting

Designed for central vacuum systems, can also be used for individual self-service vacuums

- high quality workmanship
- stable and expandable
- attractive design

How to save energy and protect the suction system:

No extraneous noise due to the sucking in of external air when the crevice nozzle is placed in the holder.

stainless steel

## The practical holder for accessories (45-58 mm) crevice nozzles

- Attachment on wall, pillar, housing or floor
- Extremely robust and stable
- Stainless steel design, ground and brushed
- Processed without welds
- Holders are designed for the new hose sleeves, which can also be easily swivelled under vacuum:

**Holder for 264 052 9 for 45 mm:**  
accessories in conjunction with crevice nozzle 264 019 3 - 264 019 4

**Holder for 264 053 0 for 58 mm:**  
accessories in conjunction with crevice nozzle 265 020 – 265 022 – 265 022 1

**A holder attached to a column:** The column can be attached to the floor from both sides or with the holder.

**Holder individually:**  
Easy installation on walls, pillars or housings.

### Receptacles twice:

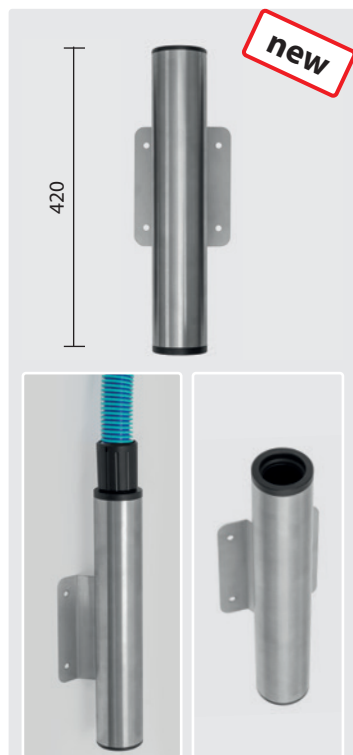

Easy mounting of the adapter plate enables the combination of two receptacles. Again, the column can be attached to the floor or the adapter plate from both sides.
