The choice of perfection

PRODUCT NO.: 10868705

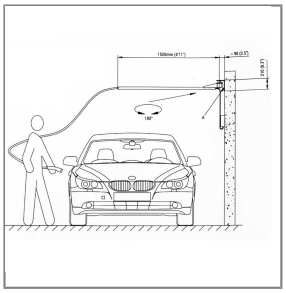

WALL BRACKET EV 1500MM POL. EVM200

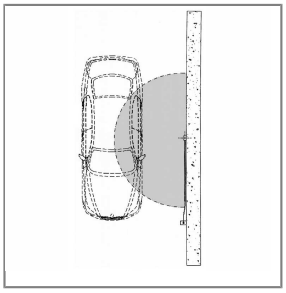

Wandmontage

Mosmatic EV wall brackets offer the ideal solution for cable management at electric charging stations in private and public areas.
They increase safety, extend the service life of cables and improve the user experience.
With a wide range of wall brackets and accessories, we offer the right solution for your needs.

The EV boom ensures a clean setup and a professional appearance. Depending on the model, the arms can be swivelled up to 270°, allowing easy access to the front and rear of the vehicle. The products are suitable for all common electric charging cables and are ideal for any garage.
