Product Description

The choice of perfection

PRODUCT NO.: 1741099363

HAWK-PUMP NMT 2120 RN 21L 200B 1450RPM 9,4KW

50Hz

NMT Nickel-Plated Series
The high-pressure pumps in the NMT Nickel Plated series are the result of in-depth laboratory research conducted by Leuco technicians, with the aim of improving the classic NMT series pump by coating the head with nickel in order to make it corrosion resistant and thus better able to stand up to wear and tear. The results obtained from the research were excellent. The high-pressure pumps in the NMT Nickel Plated series have the same pressure and power as the standard series, and are also ideal for particularly difficult, lengthy types of work.

Technical data

Flow	21 l/min	Inlet	1/2"F
Manufacturer	Hawk	Output	3/8"F
Power	7,9 kW	Pressure	200 bar
Series	NMT	Temperature	max 65°C
Type	NMT2120RN
