## ST-83 DESINFECTATION UNIT FOR 3-D DESINFECTATION

for 3D disinfection

The brand new ST-83 cold fog hand tool is ideal for small applications for fogging of disinfectants, odor neutralizers or insecticides

With 1L bottle

Nozzle size: 0.7

Two different fog nozzle inserts are included

Better swirling: Particularly suitable in smaller rooms such as passenger compartments

Larger throw range. For the treatment of entire rooms or for targeted treatment at the air intake of ventilation systems

Fields of application:

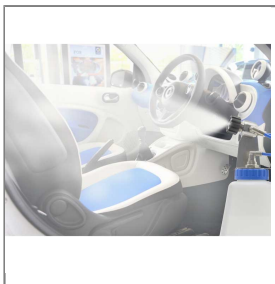

Disinfection

Humidification / cooling

Odour neutralisation, Dust Precipitation, Vehicle preparation,

Decontamination

Pest control

Inexpensive and safe application for hygienically germ-free cleaning of interiors to remove microorganisms, viruses and bacteria. Also for use on construction sites for dust deposition or mold removal  
No inhalation of the disinfectant solution as rooms do not have to be entered

The finest nebulization of active ingredients comes into the smallest gaps and into the last corner

A compressed air connection is required: Inlet pressure 3 bar, 180-220 l / min.

Extremely productive use: (e.g. 1 liter for rooms with 60 m<sup>3</sup>, room size of approx. 25 m<sup>2</sup> or 5 - 7 vehicle compartments

Advantages:

system provides a safe and cost-effective method of odour neutralisation and disinfection.

Uniform spray pattern (mist)

No inhalation of the disinfectant solution - Increased operator safety, as the area to be disinfected does not have to be entered during the process
