Product Description

The choice of perfection

PRODUCT NO.: 51830

SOCKET HEXAGON 1/4" BRASS

The brass coupling is designed for the secure connection of high-pressure components with matching internal threads.
Its robust design makes it suitable for professional use in high-pressure cleaning systems and ensures a reliable connection between the connected components.
Thanks to its compact design, it can be integrated into various high-pressure systems in a space-saving manner.

Technical data

Connection 1	1/4"F	Connection 2	1/4"F
Dimensions	17 mm hex	Height	26 mm
Length	24 mm	Manufacturer	Suttner
Material	Brass	Pressure	400 bar
Temperature	150 °C
