

PRODUCT NO.: 204000500

STEAM GUN ST 4000 3/4" F 500 MM

Professional steam gun with lance stainless steel, vented handle ST-9 380 mm and steam low pressure nozzle made out of stainless steel.

Type: ST-4000

Length: 500 mm

Inlet: 3/4" F

Outlet: Steam low pressure nozzle (Stainless steel)

Pressure: 20 bar

Temperature: 200°C

The steam guns of the series ST-4000 are the ideal solution for cleaning tasks with steam. Both series are designed for a medium temperature of up to 200°C and for a working pressure of max. 20 bar. By means of a specifically produced valve housing with 3/4" F made out of aluminium the ST-4000 is suitable for extremely high flow rates. The ST-860D is unbeatable in case of small and medium flow rates.

Apart from being enormously resistant to high temperatures the sealing copolymer is suitable for all liquids based on mineral oil as well as for inorganic acids, alkaline solutions, alcohol and anti-corrosion liquids based on amines and seawater or on their mixtures.

The fact that the hose connection is positioned in the front of the gun positively effects the professional handling with the gun as well as the heat radiation close to hand and body.

Technical data

Color	Black	Inlet	3/4" F
Length	500 mm	Length/Isolierung	380 mm
Manufacturer	Suttner	Material	Aluminium
Output	Low pressure nozzle	Pressure	20 bar
Series	ST-4000	Temperature	200°C
